PennyPilot

To make financial awareness effortless, regardless of how or when people earn.

PRODUCT DOCUMENTATION | Betechified PM Cohort | Group 3 | April 2026

PROBLEM STATEMENT

People across different income levels struggle to manage their finances effectively because they lack clear visibility into how they earn, spend, and plan. For irregular earners — gig workers, traders, freelancers — the problem is acute: income is unpredictable, but expenses are fixed. Without a tool built for this reality, they default to reactive spending, run short before obligations are due, and face persistent financial stress.

Data evidence (April 2026): 40% of users carry loans. Low-income earners cannot save consistently. Middle-income earners can save but lack discipline. High-income earners overspend. Across all segments, the core gap is the same — no visibility into how money flows in and out.

PRODUCT GOALS AND SUCCESS METRICS

Goal	Success Metric	Timeline
Validate core TAP behaviour (Tracking → Awareness → Planning)	60%+ of new users log at least 1 income and 1 obligation within the first 48 hours	Month 1
Drive early user activation	50%+ of sign-ups reach "safe-to-spend" insight in first session	Month 1
Establish consistent usage habits	40%+ of users return at least 3 times in the first week	Month 2
Grow an active user base	5,000 Monthly Active Users (Web App)	Month 6
Drive meaningful engagement	25%+ of MAU use the product weekly (WAU/MAU ratio)	Month 6
Retain users meaningfully	30%+ 30-day retention rate	Ongoing

PENNY PILOT

Improve financial awareness outcomes	50%+ of active users regularly view the dashboard or summaries weekly	Month 3
Build early trust & reliability	<2% error rate in income/obligation tracking & alerts	Ongoing
Validate willingness to pay (early monetisation signal)	10%+ of active users express interest in premium features (via survey or waitlist)	Month 4
Prepare for ecosystem integration	At least 1 pilot integration or partnership discussion initiated	Month 6

CORE FEATURES (MVP Scope)

MVP Platform: Web Application (browser-based, no download required). Manual income and expense logging. No transaction processing at the MVP stage.

Feature	Description
Manual Income Logging	Users input income (amount, optional source, date). No assumption of fixed income.
Manual Expense Logging	Users record expenses to track outflows simply.
Basic Financial Overview	Displays total income, expenses, and remaining balance.
Savings Envelopes	Users create and allocate funds into goal-based envelopes (e.g., rent, school fees).
Lightweight Onboarding	Simple sign-in (e.g., Gmail). Minimal setup to reduce friction.
Survival Dashboard (TAP Core)	Real-time view of balance, obligations, and status (On Track / Caution / At Risk).
Expense Planning & Scheduling	Users add recurring and upcoming expenses with due dates.

ENNY PILOT

ASSUMPTIONS & CONSTRAINT

1. Product & Feature Scope
    - Manual logging is the primary user behaviour at MVP; automation is deferred to Phase 3
    - MVP is a web application only; native mobile apps are deferred until traction justifies the cost
    - WhatsApp Bot is Phase 2; web experience must be validated first
    - No transaction processing (send/receive/store funds) at MVP
    - No lending, credit scoring, or investment features at MVP
    - No AI-driven financial advisory at MVP

2. User Behaviour Assumptions
    - Users are willing to manually log income and expenses if the process is fast and simple
    - Users value clarity and simplicity over complexity in financial tools
    - Users will engage more with plain-language insights than complex dashboards
    - Financial awareness (not just tracking) can drive behaviour change over time
    - Users prefer low-friction onboarding and may drop off if the setup is too complex

3. Technical Constraints
    - System must perform reliably on low-to-mid range smartphones and browsers
    - Internet connectivity may be inconsistent, affecting real-time usage
    - Data synchronisation across sessions must be lightweight and efficient
    - Push notifications are limited to browser capabilities at MVP
    - Scalability considerations are deferred until the post-validation phase

4. Data & Accuracy Assumptions
    - Financial insights are only as accurate as user-input data at MVP
    - Users may input incomplete or inconsistent data, affecting projections
    - The system must remain useful even with partial data inputs

5. Regulatory & Compliance Constraints
    - Full compliance with NDPR (Nigeria Data Protection Regulation) is required before launch
    - User financial data must be secure, encrypted, and not shared with third parties
    - Avoidance of regulated activities (lending, investments, payments) at the MVP stage
6. Platform & Accessibility Constraints
    - The product is designed for browser access only at MVP
    - No offline or USSD functionality at MVP
    - English is the default language at launch; local language support deferred

PENNY PILOT

7. Business & Monetisation Assumptions
    - Users will adopt a freemium model once the core value is demonstrated
    - Willingness to pay is expected to come from advanced insights and control features, not basic tracking
    - Early-stage focus is on behaviour validation, not revenue maximisation

8. Integration Constraints
    - No external financial integrations (banks, wallets) at MVP
    - The product operates as a standalone system in the early stages
    - Ecosystem integrations are dependent on partnerships and API availability in later phases

ROAD MAP (NOW/NEXT/LATER)

Now (MVP — Months 1–3)	Next (Phase 2 — Months 4–6)	Later (Phase 3 — Months 7–12)
Income Logging (Manual)	Survival Dashboard (TAP)	Bank & Wallet Integration (Auto-logging)
Expense Logging (Manual)	Expense Scheduling	Transaction Processing (Send/Receive)
Basic Financial Overview	Spending Limits	Income Pattern Detection
Savings Envelopes (Basic)	Smart Alerts	Advanced Financial Insights & Guidance
Simple Summary	Weekly Smart Summary	Debt Management (Enhanced)
	WhatsApp Bot (Chat Logging)	PennyPilot for Business (SME Tools)

		Corporate Wellness Portal (B2B)
		Premium Subscription (₦1,500/month)
		Multilingual Support (Pidgin, Yoruba, Hausa)
		Native Mobile Apps (iOS & Android)
